INTERNATIONAL CONFERENCE ON CLINICAL INNOVATIONS

December 2nd & 3rd, 2022

Prof. MRD Block Auditorium,
PES University Campus,
Bengaluru

Jointly hosted by,
FITTO Patient Management Pvt Ltd
and P.E.S University

Be it the use of convex lenses to create a microscope for identifying bacteria or the application of a galvanometer to the heart giving rise to the modern day ECG; technology and healthcare have always gone hand-in-hand. The COVID-19 pandemic has shown doctors how technology can be used in every step, from diagnosis and investigations to treatment of patients.

FITTO Patient Management Pvt Ltd and P.E.S University are proud to present the International Conference on Clinical Innovations, to celebrate this marriage between Healthcare and Technology by bringing together a group of like-minded peers to discuss the advancements in the various specialties.

We sincerely hope our efforts will ignite the fuel for modern research, not only this time, but for years to come.

With the power of data analytics, cybersecurity, research, artificial intelligence (AI), and machine learning (ML), FITTO has pioneered the convergence of technological innovation and healthcare, transforming the lives of millions of patients across India. Our telemedicine services, at-Home COVID-19 Care, NSDL-registered training curriculum, and comprehensive research solutions have brought to the forefront a new way of healing even in the most remote of locations. AI and ML have allowed for the creation of inventive products like VIDE (Virtual Insulin Dose Estimator), DSS (Dengue Shock Syndrome) Predictor, and THYDOR (Thyroid Dose Estimator), which have the potential to save many lives and provide affordable medical solutions to families all over the country.

PES University, located in Bengaluru, India, is one of the country's leading teaching and research universities. The University is committed to providing "education for the real world" that inspires students to realize their potential.

The students graduate with the ability to adapt to an intellectually and technologically changing environment. Over the years, PESU has accomplished this with the participative efforts of the management, staff, students and parents.

In the conference, we will discuss the advancements of medical technology in the fields of

- Internal Medicine
- Orthopaedic Surgery
- General Surgery
- Oncology
- Obstetrics & Gynaecology.

The conference will take place in a hybrid format with both online and offline attendees.
